RETRACTABLE SCREENS

Live Life Outside.

EXTERIOR SCREENS

Dynamic by Design

Enjoy the outdoors on your terms! With the touch of a button, an Exterior Screen from Rainier will enhance your home and provide shade, energy savings, ventilation and insect protection. Rainier has a history of providing exceptionally crafted, custom-made retractable shading systems. Our tradition of quality guarantees a sound investment in your home's comfort and elegance.

Block the Sun, Not the View

Rainier Screens are designed to filter out the majority of the sun's harmful effects while preserving your outdoor view and allowing you to better control your interior lighting. Our product is used to reduce annoying glare on computers and television screens and diminishes the harmful UV rays that fade your valuable home furnishings.

LIVE LIFE OUTSIDE

Fabric

Rainier Screens are available in a wide range of fabric, styles and color selections. They can block the sun and keep your view, or provide complete blackout if desired. Fabric warranties vary depending on your selection, but Rainier has a number of fabric selections with 10-year limited warranties on exterior applications.

Colors

Rainier Screens are available in 10 standard frame colors; custom colors are available to allow you to match your specific color scheme. Every screen is built to order with powder coating done in-house, resulting in a beautiful appliance-like finish and requiring little maintenance.

Innovative Retractable Screen Solutions

Rainier Screens feature our innovative SRS™ Side Retention System, the strongest retention system available in the market today. The system is designed to keep the screen mesh stable, and allows for worry-free use of your screen, even in high wind conditions. Unlike other screen systems, your Rainier SRS™ screen can be left down when the wind blows, providing protection and energy savings.

Stop the Bugs from Bugging You

Keep insects where they belong – outside! The SRS™ Side Retention System has the additional benefit of being insect proof. To fully enclose your living area from pesky bugs, we add a brush on the hem bar to seal the bottom of the system. And our exclusive Screen Clean feature, built into the housing of your screen, brushes bugs and debris off the screen mesh, preventing pests from entering your home or nesting in the housing.

Where Quality is Timeless

Rainier was founded in 1896 and has earned our reputation as a provider of superior quality products. Each Rainier Screen has TUV Certification with a unique serial number. This seal indicates that your screen has been exposed to rigorous independent testing and complies with all endurance safety standards required for listed electrical products.

This certification shows that we are held to a much higher standard than our peers, producing the most reliable and safest screen systems in North America.

Shade at Your Fingertips

We offer a wide variety of motors and control options. Each screen from Rainier is made to order, so that you get exactly the options that suit your home and lifestyle. We feature motors and control manufactured by Somfy, the world leader in tubular motors. Time tested dependability makes Radio Technology Somfy (RTS) the smart choice for Rainier Screens. We've found that customers with automated screens have the highest satisfaction levels with their shading systems.
